

# Checklist: Prepare Your Packaging Data

- You know what Extended Producer Responsibility (EPR) is.
- You know which US states have packaging EPR laws, and you've identified your obligations.
- You know what specific packaging data you will need to have prepared for mandatory reports.
- You have an efficient method for gathering and analyzing packaging data from your suppliers.
- You have an accurate and streamlined way of verifying your suppliers' packaging data (in order to reduce the possibilities of overpayment or penalties due to inaccurate data).
- You have a data management and reporting system developed specifically for packaging data analysis (in order to save time, hassle, costly do-overs and reporting errors).
- You know how to submit packaging reports across affected states/provinces.
- You know how to estimate your EPR costs that will be due under the new laws.
- You have a plan to minimize EPR costs under the new laws.
- You have a method to monitor ongoing changes to rules and regulations.
- Your team is apprised of changes to EPR regulations that are coming down the pike in various US states (and the world).

## Missing Anything?

If you missed checking any of the boxes above, we invite you to schedule a no-obligation, 30-minute consultation with one of our experts to discuss your roadmap for packaging EPR compliance. We can help you determine your obligations and the best way forward.

and sustainable  
packaging

# Think *circular*

**Reconomy is an international circular economy specialist** that has a tech-enabled, people-powered approach to facilitate circular models for our customers.

Improved outcomes are delivered through a huge range of platform-based capabilities organised into three 'loops':

## Recycle *loop*

Redefining waste and resource management with the latest technology and data, enabling customers to make the best use of their materials and propelling them towards greener practices.

## Comply *loop*

Enabling customers to solve increasingly complex environmental regulatory challenges using data, expert knowledge and thought leadership to drive business accountability across the globe.

## Re-use *loop*

Providing intelligent technology platforms and agile delivery models for pre-retail logistics and product returns, fulfilment and processing, on behalf of many of Europe's largest retailers.
